

DELIVERABLE 01 · BRAND GUIDELINES

American Fusion. Brand Guidelines.

Visual identity, voice and tone, and the three-lane founder narrative architecture.

Prepared by BotMakers Inc. · May 2026 · Version 1.0

Color Palette.

Extending the existing americanfusionenergy.com palette into a complete system for social media, video, slides, and print. Navy is the anchor; Electric Blue carries the plasma/energy story; Lime is a high-signal accent for moments of emphasis only.

Primary Palette

		
Fusion Navy HEX #0A1F44 Anchor. Headers, dark backgrounds, primary text on light.	Electric Blue HEX #00B4D8 Plasma accent. Charts, links, highlights, brand moments.	Signal Lime HEX #7FFF00 Reserved accent. Use sparingly for emphasis.

Supporting Palette

		
Off-White HEX #F7F8FA Backgrounds, slide canvas, card fills.	Gray 60 HEX #6B7280 Secondary text, captions, dividers.	Border HEX #D9DDE3 Hairlines, table borders, separators.

Usage Rules

- **Navy is the brand.** Default to navy for headers, large type, and primary surfaces. Aim for navy to occupy 60–70% of visual weight.
- **Electric Blue does the work.** Charts, links, callouts, plasma/energy visual storytelling. ~20–25% of visual weight.

-
- **Lime is rare.** Use it for one element per visual: a CTA underline, a key stat callout, a single accent stroke. Never bodies of type. ~5% max.
 - **White space is a palette color.** Off-white and white together carry 50%+ of every layout.

Typography.

Two-typeface system. Geometric sans for display and headlines; humanist sans for body. Web-safe fallbacks ensure consistency across email, slides, social, and web.

Role	Primary	Web/Print Fallback	Use
Display / Headlines	Inter Tight (Bold/Black)	Helvetica Neue Bold, Arial Bold	H1–H2 on slides, social card titles, site hero
Subheads / Eyebrow	Inter (Semibold)	Helvetica Neue, Arial	Section labels, kicker text, captions
Body	Inter (Regular)	Helvetica, Arial, sans-serif	All long-form copy: LinkedIn posts, newsletter, web body
Data / Code / Tables	IBM Plex Mono	Menlo, Consolas, monospace	Specs, KPI dashboards, technical diagrams
Executive Voice (signature)	Inter Italic 11pt	Helvetica Italic	Pull quotes from Nelson/Reid/Hawkins in newsletter

Type Scale (Web & Slides)

Style	Size / Weight	Line Height	Tracking
H1 Display	48–64pt Bold	1.05	–1%
H2	32pt Bold	1.15	0
H3	20pt Semibold	1.25	0
Body	16pt Regular	1.55	0
Caption	12pt Regular	1.4	+1%
Eyebrow / Label	11pt Bold UPPERCASE	1.2	+8%

Logo System.

Four lockups handle every use case. The wordmark is the primary mark; the AF monogram is for tight spaces (favicons, social avatars, watermarks).

Lockup Specifications

Lockup	Use Case	Min Size	Clear Space
Primary Wordmark AMERICAN FUSION (navy on white)	Default. Website header, slides, letterhead, press releases.	Web: 140px wide Print: 1.5 in	0.5x mark height on all sides
Reverse Wordmark AMERICAN FUSION (white on navy)	Dark backgrounds, video lower-thirds, social cards.	Web: 140px wide Print: 1.5 in	0.5x mark height on all sides
Monochrome Single-color navy or black	Print constraints, fax, single-color collateral.	Web: 120px Print: 1.25 in	0.5x mark height on all sides
AF Monogram Square avatar lockup	Social avatars, favicons, app icons, watermarks.	48 × 48 px minimum	0.25x mark height on all sides

Logo Don'ts

- Do not stretch, skew, or rotate the wordmark.
- Do not place the logo on busy photography without a navy overlay or solid panel behind it.
- Do not change the proportions, kerning, or color of the wordmark.
- Do not add drop shadows, glows, gradients, or outlines.
- Do not place the wordmark over Electric Blue or Lime — only Navy, Off-White, White, or photographic navy overlay.

Note: Designed logo files (SVG, PNG, EPS) to be produced by AMFN's design partner against these specifications, or under separate scope. This document defines the system; production rendering is a separate deliverable.

Voice & Tone.

The voice that American Fusion uses on every channel, in every piece of content. The rule is constant; tone flexes by context.

The Voice (always)

American Fusion sounds like a serious engineering company operated by people who understand the stakes. The voice is:

Quality	What it means in practice
Technical-credibility over hype	Specifics beat adjectives. Numbers beat 'revolutionary.' Welds beat 'cutting-edge.' If a sentence could appear in any cleantech startup's marketing, rewrite it.
First-person, restrained	'We are building.' 'We chose D-He-3 because.' Direct, not boastful. Confidence without volume.
Fact-anchored	Every claim cites an instrument reading, an IEA statistic, an executive order, or a dated company milestone. Never 'experts agree' or 'studies show.' Name the source.
Plainspoken about hard things	Helium-3 supply is hard. D-He-3 ignition is hard. We say so. The credibility comes from owning the challenge, not pretending it doesn't exist.
Patriotic without nationalism	American Fusion. Texas-built. Defense-aligned. We can say all three plainly. We never use flag-waving language, partisan framings, or 'us vs. them' constructs.

Tone (flexes by audience)

Audience	Tone	Example opener
DoD / Procurement	Operational, sober, precise	"Executive Order 14299 set a deadline. Here is what fusion has to bring to the second cohort."
Hyperscaler buyers	Engineering-to-engineering, deployment-focused	"AI rack density is up 11× since 2020. The grid is not. Here is the math on baseload."
Institutional investors	Transparent, milestone-anchored, no surprises	"This quarter we completed the structural frame on the 5 MW Texatron unit. Independent test results expected in [timeframe]."
Retail investors	Accessible, founder-direct, plain-English	"A short note from Brent on what happens next."
Engineering talent	Mission-first, technically respectful	"We are hiring a controls engineer to own the plasma diagnostics integration. Here is the problem."

Three-Lane Founder Architecture.

Each executive has a defined lane, a defined audience, and a defined cadence. This eliminates voice collision, ensures coverage of all priority topics, and provides redundancy.

BRENT NELSON

CEO, Kepler Fusion Technologies — Technical & Operational Voice

Lane: The engineering of the Texatron platform. The team. The lab. The path to commercialization.

Topics: Build-in-public progress, technology milestones, diagnostics, aneutronic physics, the helium-3 supply chain, engineering hires.

Primary audience: Defense procurement officers, hyperscaler energy buyers, senior engineering talent.

Cadence: 5–7 LinkedIn posts/week. 2–3 X posts/week. Monthly YouTube 'CEO Update.' Quarterly podcast appearances.

Channels: LinkedIn (primary), X, YouTube, podcasts.

SAMUEL REID

Government Strategy & Procurement Advisor — Defense & Government Voice

Lane: Federal energy resilience. The DoD nuclear mandate. ANPI, Janus, EO 14299. Allied defense procurement.

Topics: Procurement landscape analysis, executive order interpretation, second-cohort positioning, allied (NATO, Canadian DND) opportunities.

Primary audience: DoD program managers, defense industry analysts, federal procurement officers, defense press.

Cadence: 2–3 LinkedIn posts/week. Monthly 'Procurement Note' byline in the newsletter. Defense-conference appearances.

Channels: LinkedIn (primary), newsletter, defense podcasts and conferences.

RICHARD HAWKINS

CEO, American Fusion Inc. — Capital Markets & Corporate Voice

Lane: The public-company strategy. OTCQB uplisting. Frankfurt secondary. Capital structure. The investor relationship.

Topics: Milestone announcements, financial transparency, listing progress, corporate strategy, partnerships and offtake discussions.

Primary audience: Retail investors, institutional investors, market makers, financial press.

Cadence: 2 LinkedIn posts/week. Quarterly investor video update. Earnings-cycle content. Financial-markets podcasts.

Channels: LinkedIn, investor relations site, YouTube, financial podcasts.

Do / Don't Language.

Specific replacements. Every editor on the team uses this table.

Don't write	Do write	Why
"Revolutionary fusion technology"	"Aneutronic D–He-3 fusion, modular form factor"	Specific over puffery.
"Game-changing for AI infrastructure"	"Maps to the 950 TWh data-center demand projected by 2030"	Cite the number.
"We are disrupting energy"	"We are competing in the post-microreactor procurement window"	Name the actual category.
"Cutting-edge"	[Just describe what it is]	If you have to say it, you don't have it.
"Limitless clean energy"	"Aneutronic fusion: no long-lived radioactive waste, lower neutron flux"	Specific physical claims, not vibes.
"World-class team"	[Name them and what they built]	Show, don't claim.
"\$10+ Trillion Market" (institutional use)	"\$40–80B by 2035, \$350B+ by 2050 (Future Markets Inc.)"	Defensible figures for sophisticated audiences. \$10T OK for retail/vision context only.
Quoting an unnamed 'industry expert'	Cite the IEA, DOE, EO 14299, or a named analyst	Sourced or it didn't happen.
Long sentences with three subordinate clauses	Short sentences. Then one longer one. Then short again.	Mumgaard and Kirtley write short. So do we.
Emoji in executive posts	Plain text. Specific. Confident.	Engineering company. Not a consumer brand.

This document defines the brand. The Editorial Calendar (Deliverable 02) operationalizes it. The First Content Batch (Deliverable 03) demonstrates it.
